| AY 2021-22 | | | | | |
| Course Information | | | | | |
| Programme | | B.Tech. (Information Technology) | | | |
| Class, Semester | | Final Year B. Tech., Sem VII | | | |
| Course Code | | 14IT401 | | | |
| Course Name | | Data Mining | | | |
| Desired Requisites: | | Statistics and Mathematics | | | |
| Teaching Scheme | | Examination Scheme (Marks) | | | |
| Lecture | 3 Hrs/week | T1 | T2 | ESE | Total |
| Tutorial | - | 20 | 20 | 60 | 100 |
| Practical | - | | | | |
| Interaction | - | Credits: 3 | | | |
| Course Objectives | | | | | |
| 1 | To introduce basic concepts, principles and techniques of data mining. | | | | |
| 2 | To compare various data mining tools. | | | | |
| 3 | To impart different data mining techniques to handle real world problems | | | | |
| Course Outcomes (CO) with Bloom's Taxonomy Level | | | | | |
| At the end of the course, the students will be able to, | | | | | |
| CO1 | Summarize the basic concepts and techniques of data mining | | | | Understand |
| CO2 | Apply data mining algorithms for solving real life problems | | | | Apply |
| CO3 | Evaluate optimized solution in data mining using complex and huge dataset | | | | Evaluate |
| Module | Module Contents | | | | Hours |
| I | Introduction : Basic Concepts in Data Mining Data mining background, classification of Data Mining, Data Mining Techniques. Data Preprocessing, Applications | | | | 7 |
| II | Data Mining Primitives Data Mining Primitives, Architecture of Data Mining, Knowledge representation, Data generalization & summarization. | | | | 6 |
| III | Association Rule mining, Frequent itemset generation,, Association Rule generation, correlation analysis, constraint based Association mining. | | | | 7 |
| IV | Classification & Prediction Issues, Decision Tree, Bayesian classifier, Back propagation, Classification methods, Prediction, ensemble classification | | | | 7 |
| V | Cluster analysis similarity metrics, Clustering methods, (partitioning based, hierarchical based, density based, grid based), | | | | 6 |
| VI | Introduction to Mining Complex Data sets Mining spatial data, temporal data, Mining time series, mining text datasets, web mining | | | | 6 |
| Text Books | | | | | |

AY 2021-22

Course Information

| | |
|----------------------------|----------------------------------|
| Programme | B.Tech. (Information Technology) |
| Class, Semester | Final Year B. Tech., Sem. VII |
| Course Code | 4IT402 |
| Course Name | Cryptography & Network Security |
| Desired Requisites: | Computer Networks |

| Teaching Scheme | | Examination Scheme (Marks) | | | |
|--------------------|------------|----------------------------|-----------|------------|--------------|
| Lecture | 3 Hrs/week | T1 | T2 | ESE | Total |
| Tutorial | - | 20 | 20 | 60 | 100 |
| Practical | - | | | | |
| Interaction | - | Credits: 3 | | | |

Course Objectives

| | |
|----------|---------------------------------------------------------------------|
| 1 | To elaborate the fundamental network security parameters |
| 2 | To impart various encryption techniques |
| 3 | To apprise security mechanisms and services against network threats |

Course Outcomes (CO) with Bloom's Taxonomy Level

At the end of the course, the students will be able to,

| | | |
|------------|----------------------------------------------------------------------|---------|
| CO1 | Compare security aspects of information | Analyze |
| CO2 | Practice various encryption algorithms by examining crypt-complexity | Apply |
| CO3 | Compare access control mechanisms and authentication services | Analyze |

| Module | Module Contents | Hours |
|--------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|
| I | Security Overview: Services, Mechanism and Attacks, The OSI Security Architecture, Classical Encryption Techniques, Substitution Techniques, Transposition Techniques, Steganography | 7 |
| II | Block Cipher: Block Cipher Design Principles, Modes of Data Transfer, Symmetric Cipher Model, Data Encryption Standard, Security of 2DES, 3DES & AES | 6 |
| III | Public Key Encryption: Principles of Public-Key Cryptosystem, RSA Algorithm, Distribution of Public Keys, Diffie-Hellman Key Exchange | 7 |
| IV | Authentication Functions and Services: Hash Functions, Message Authentication Codes, Digital Signatures Kerberos, X.509 Certificates | 7 |
| V | IP & Web Security: IP Security Architecture, Authentication Header, Encapsulating Security Payload, Combining Security Associations Web Security Considerations, Secure Socket Layer and Transport Layer Security, Secure Electronic Transaction | 6 |
| VI | Perimeter Security: Intruders, Intruder Detection, Password Management, Malwares Firewall Configurations, Trusted Systems, Honeypots | 6 |

CO-PO Mapping

| | Programme Outcomes (PO) | | | | | | | | | | | | PSO | | |
|------------|-------------------------|---|---|---|---|---|---|---|---|----|----|----|-----|---|---|
| | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 1 | 2 | |
| CO1 | | 3 | | | | | 1 | | | | | | | 1 | 2 |
| CO2 | 2 | | | | 3 | | | | | | | | | 1 | |
| CO3 | | | 2 | 1 | | | | | | | | | | | |

The strength of mapping is to be written as 1,2,3; Where, 1:Low, 2:Medium, 3:High
Each CO of the course must map to at least one PO.

Assessment

The assessment is based on 2 in-semester examinations in the form of T1 (Test-1) and T2 (Test-2) of 20 marks each. Also there shall be 1 End-Sem examination (ESE) of 60 marks. T1 shall be typically on modules 1 and 2, T2 based typically on modules 3, 4 and ESE shall be on all modules with nearly 50% weightage on modules 1 to 4 and 50% weightage on modules 5, 6.

Assessment Plan based on Bloom's Taxonomy Level

| Bloom's Taxonomy Level | T1 | T2 | ESE | Total |

AY 2021-22

Course Information

| | |
|----------------------------|----------------------------------------|
| Programme | B.Tech. (Information Technology) |
| Class, Semester | Final Year B. Tech., Sem VII |
| Course Code | 4IT451 |
| Course Name | Data Mining Lab |
| Desired Requisites: | Basic computer programming, Statistics |

| Teaching Scheme | | Examination Scheme (Marks) | | | |
|--------------------|------------|----------------------------|------------|------------|--------------|
| Lecture | - | LA1 | LA2 | ESE | Total |
| Tutorial | - | 30 | 30 | 40 | 100 |
| Practical | 2 Hrs/Week | | | | |
| Interaction | - | Credits: 1 | | | |

Course Objectives

| | |
|----------|---------------------------------------------------------------------|
| 1 | To demonstrate basic concepts, principles of data mining techniques |
| 2 | To develop programming skills of data mining tools |
| 3 | To introduce data mining approaches to handle real world datasets |

Course Outcomes (CO) with Bloom's Taxonomy Level

| | | |
|---------------------------------------------------------|------------------------------------------------------------|---------|
| At the end of the course, the students will be able to, | | |
| CO1 | Apply appropriate data preprocessing and mining techniques | Apply |
| CO2 | Compare various data mining algorithms | Analyze |
| CO3 | Develop a data mining solution to solve real word problems | Create |

List of Experiments / Lab Activities

| |
|--------------------------------------------------------------------------------------------|
| List of Experiments: |
| Experiment 1: Perform data smoothing. |
| Experiment 2: Perform data transformation. |
| Experiment 3: Perform data normalization. |
| Experiment 4: Finding summary for dataset. |
| Experiment 5: Plotting various types of graphs from dataset. |
| Experiment 6: Data Preparation and Exploration Visualization Techniques |
| Experiment 7: Performance Metrics and Assessment Metrics for Prediction and Classification |
| Experiment 8: Supervised Learning Methods Classification |
| Experiment 9: Supervised Learning Methods Logistic Regression |
| Experiment 10: Unsupervised Learning Methods : Association Rules |
| Experiment 11: Unsupervised Learning Methods : Cluster Analysis |
| Experiment 12: Perform various data mining tasks using WEKA and KNIME OSS |
| Experiment 13: Using some sample data sets implement and test data mining techniques. |

| Course Information | | | | | |
| Programme | B.Tech. (Information Technology) | | | | |
| Class, Semester | Final Year B. Tech., Sem VII | | | | |
| Course Code | 4IT452 | | | | |
| Course Name | Open Source Software Lab | | | | |
| Desired Requisites: | Unix Operating Systems, Software Engineering, Computer Network, Web Technology | | | | |
| Teaching Scheme | | Examination Scheme (Marks) | | | |
| Lecture | - | LA1 | LA2 | Lab ESE | Total |
| Tutorial | - | 30 | 30 | 40 | 100 |
| Practical | 2 Hrs/week | | | | |
| Interaction | 1 Hr | Credits: 2 | | | |
| Course Objectives | | | | | |
| 1 | To introduce the open source software for software engineering | | | | |
| 2 | To contribute or develop software in open source environment | | | | |
| 3 | To compare various open source software | | | | |
| Course Outcomes (CO) with Bloom's Taxonomy Level | | | | | |
| At the end of the course, the students will be able to, | | | | | |
| CO1 | Practice the open source software tools in software development | | | | Apply |
| CO2 | Analyze the economics of open source software | | | | Analyze |
| CO3 | Create open source software or contribute to existing open source software | | | | Create |
| Module | Module Contents | | | | Hours |
| I | Introduction Introduction to open sources- Need of Open Sources- Advantages of Open Sources-Applications of Open Sources- commercial aspects of Open source movement, Notion of Community, Guidelines for effectively working with FOSS community, Benefits of Community based Software Development Requirements for being open, free software, open source software, FOSS Licensing Models –GPL, AGPL, LGPL, FDL, Economy of FOSS, History of Linux, Kernel Versions. | | | | 3 |
| II | Open source development and FOSS languages Proprietary software development model vs. Open Source software development model, models for FOSS- Cathedral model and Bazaar model. Software package management: RPM, DEB – building. | | | | 2 |
| III | Introduction to collaborative development Developer communities, mailing lists, IRC, wiki, version control (git/github), bug tracking, handling non-technical issues, localization, accessibility, documentation FOSS code by doxygen. | | | | 2 |
| IV | Open source Virtualization and FOSS Containerization technologies: docker, Container Images, alternative to virtualization: rocket, etc, Containerization of FOSS tools | | | | 2 |
| V | Configuration of Network services DHCP, DNS, WINES, NFS, NIS, Web server, Ftp Server, Telnet Server, etc. GUI configuration tools: webmin or usermin. | | | | 2 |
| VI | Web Server Tools and FOSS CMS Installation and Administration of Web Servers- LAMP, XAMPP, Apache, mysql, etc. Installation of Content Management Systems – WordPress, Joomla, Drupal, Moodle, MaheraXoops, Magento, social networking. | | | | 2 |
| List of Experiments / Lab Activities | | | | | |

| | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|
| <ol style="list-style-type: none"> 1. Compare the various Linux Distributions and their usage 2. Comparison of various Open Source tools : Project management 3. Comparison of various Open Source tools: bug tracking 4. Comparison of various Open Source tools: version control system 5. Comparison of various Open Source tools: CMS 6. Compilation and installation of Linux Kernel 7. Creation Of RPM/DEB packages 8. Excise the development of Open Source Software:-Develop simple software for basic needs such as calculator, editor or any small noticeable contribution in existing FOSS. 9. Configuration of Server based services and their uses 10. Docker container : An open source software development platform | |

| Course Objectives | | | | | |
| 1 | To define basics of Software Testing and techniques. | | | | |
| 2 | To discuss project management cycle for software development. | | | | |
| 3 | To illustrate Agile development techniques for software development. | | | | |
| Course Outcomes (CO) with Bloom's Taxonomy Level | | | | | |
| At the end of the course, the students will be able to, | | | | | |
| CO1 | Demonstrate use of automation testing tools | | | | Apply |
| CO2 | Implement project management techniques like planning, risk analysis, scheduling. | | | | Apply |
| CO3 | Evaluate software development life cycle using Agile tools and DevOps. | | | | Evaluate |
| Module | Module Contents | | | | Hours |
| I | Software Testing Introduction: Introduction, Importance of Software testing, How to conduct Software testing, Basic terminology of Software testing, Manual Testing Process, Difference between Manual and Automated Testing, Software testing Roles and Responsibilities, V Model of Software Development | | | | 7 |
| II | Test Case Design Techniques Static Techniques, Dynamic Techniques, Black-box Test Techniques, White-box Test Techniques, Experience-based Test Techniques, Levels of Software Testing | | | | 6 |
| III | Types of Software Testing: i) Functional Testing: Unit Testing, Integration Testing, System Testing, User Acceptance Testing, Sanity/Smoke Testing, Regression Testing. ii) Non Functional Testing: Performance Testing, (Load, Stress, Spike and Endurance Testing), Usability Testing, Compatibility Testing, Reliability Testing, Security Testing | | | | 7 |
| IV | Project Management Software Product Management, Requirements Analysis/Design, Planning and Scheduling, Monitoring, Risk Analysis, Project Leadership, Teamwork, Project Organization and Team Structures, Resource Allocation, Software Quality Management Software Testing Standards | | | | 6 |
| V | Agile testing The Fundamentals of Agile Software Development, Extreme Programming, Aspects of Agile Approaches, The Differences between Testing in Traditional and Agile Approaches, Status of Testing in Agile Projects, Role and Skills of a Tester in an Agile Team, Agile Testing Methods, Assessing Quality Risks and Estimating Test Effort, Techniques in Agile Projects, Tools in Agile Projects | | | | 6 |

| | | |
|----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---|
| VI | DevOps Testing DevOps, Version control with Git, Git, Jenkins, Maven, Integration with Jenkins, Continuous Integration and Continuous Delivery CI/CD: Jenkins Creating pipelines, Setting up runners Containers and container orchestration (Docker and Kubernetes) or application development and deployment. | 7 |
|----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---|

List of Experiments / Lab Activities

List of Experiments:

1. Demonstrate Debugging Tool.
2. Implement White Box Testing(Manual)
3. Implement Black Box Testing(Manual)
4. Implement Unit Testing(Automated): TestNG
5. Implement Performance Testing(Automated) using JMetre:
6. Demonstrate Test Management Tool:TestStuff
7. Demonstrate Test Management Tool:TestLink
8. Demonstrate Web-Test Automation Tool- Selenium IDE
9. Demonstrate Web-Test Automation Tool- Selenium Web-Driver
10. Demonstrate Project Management Tool:JIRA
11. Implement Test automation using DevOps.
12. Demonstrate project life cycle using Agile framework.

CO-PO Mapping

| | Programme Outcomes (PO) | | | | | | | | | | | | PSO | |
|------------|-------------------------|---|---|---|---|---|---|---|---|----|----|----|-----|---|
| | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 1 | 2 |
| CO1 | | | 1 | | 3 | | | | | | | | 2 | |
| CO2 | | | | | | | | | 2 | | 3 | | | |
| CO3 | | | | | | | | | | | | 2 | | |

The strength of mapping is to be written as 1,2,3; Where, 1:Low, 2:Medium, 3:High
Each CO of the course must map to at least one PO.

Assessment

The assessment is based on 2 in-semester evaluations (ISE) of 10 marks each, 1 mid-sem examination (MSE) of 30 marks and 1 end-sem examination (ESE) of 50 marks.

MSE is based on the modules taught till MSE (typically Module 1-3) and ESE is based on all modules with 30-40% weightage on modules before MSE and 60-70% weightage on modules after MSE.

Assessment Plan based on Bloom's Taxonomy Level

| Bloom's Taxonomy Level | LA1 | LA2 | ESE | Total |
|-------------------------------|------------|------------|------------|--------------|
| Remember | | | | |
| Understand | 15 | 10 | | 25 |
| Apply | 10 | 10 | 10 | 30 |
| Analyze | 5 | 10 | 10 | 25 |
| Evaluate | | | 10 | 10 |
| Create | | | 10 | 10 |
| Total | 30 | 30 | 40 | 100 |

Course Information

| | |
|----------------------------|----------------------------------|
| Programme | B.Tech. (Information Technology) |
| Class, Semester | Final Year B. Tech., Sem VII |
| Course Code | 4IT491 |
| Course Name | Project 1 |
| Desired Requisites: | |

Teaching Scheme

Examination Scheme (Marks)

| Lecture | - | LA1 | LA2 | Lab ESE | Total |
|-------------|------------|-------------------|-----|---------|-------|
| Tutorial | - | 30 | 30 | 40 | 100 |
| Practical | 6 Hrs/Week | | | | |
| Interaction | - | Credits: 3 | | | |

Course Objectives

| | |
|----------|----------------------------------------------------------------------------|
| 1 | To identify real life needs and project requirements |
| 2 | To elaborate technical solutions through latest design & development tools |
| 3 | To compare and analyze the IT platforms for efficient solutions |

Course Outcomes (CO) with Bloom's Taxonomy Level

At the end of the course, the students will be able to,

| | | |
|------------|-------------------------------------------------------------------------|----------|
| CO1 | Integrate project at every stage of the software development life cycle | Apply |
| CO2 | Recommend project plans that address real-world challenges | Evaluate |
| CO3 | Develop software projects with strategic goals | Create |

List of Experiments / Lab Activities

List of Experiments:

Project is to be carried out in a group of maximum 5 to 6 students.

Each group will carry out a project by developing any application software based on the following areas.

1. Application can be based on any trending new technology.
2. Application can be extension to previous projects.
3. Project group should achieve all the proposed objectives of the problem statement.
4. The work should be completed in all aspects of design, implementation and testing and follow software engineering practices.
5. Project reports should be prepared and submitted in soft and hard form along with the code and other dependency documents. Preferable use online code repositories (github/bitbucket)
6. Project will be evaluated continuously by the guide/panel as per assessment plan.
7. Presentation and report should use standard templates provided by department.

Project report (pre-defined template) should be prepared using Latex/Word and submitted along with soft copy on CD/DVD (with code, PPT, PDF, Text report document & reference material) or on an online repository.

Students should maintain a project log book containing weekly progress of the project.

| Assessment | | | | |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------|---------------------|---------------------------------------------------------------------|--------------|
| There are three components of lab assessment, LA1, LA2 and Lab ESE. IMP: Lab ESE is a separate head of passing. LA1, LA2 together is treated as In-Semester Evaluation. | | | | |
| Assessment | Based on | Conducted by | Typical Schedule (for 26-week Sem) | Marks |
| LA1 | Lab activities, attendance, journal | Lab Course Faculty | During Week 1 to Week 6 Marks Submission at the end of Week 6 | 30 |
| LA2 | Lab activities, attendance, journal | Lab Course Faculty | During Week 7 to Week 12 Marks Submission at the end of Week 12 | 30 |
| Lab ESE | Lab activities, attendance, journal | Lab Course Faculty | During Week 15 to Week 18 Marks Submission at the end of Week 18 | 40 |
| Week 1 indicates starting week of a semester. The typical schedule of lab assessments is shown, considering a 26-week semester. The actual schedule shall be as per academic calendar. Lab activities/Lab performance shall include performing experiments, mini-project, presentations, drawings, programming and other suitable activities, as per the nature and requirement of the lab course. The experimental lab shall have typically 8-10 experiments. | | | | |

| Assessment Plan based on Bloom's Taxonomy Level (Marks) (For lab Courses) | | | | |

Course Objectives

| | |
|----------|------------------------------------------------------------------------------|
| 1 | To elaborate fundamental knowledge of software defined network |
| 2 | To impart Software Defined Network operation in data centre |
| 3 | To introduce the network administration through virtualization and open flow |

Course Outcomes (CO) with Bloom's Taxonomy Level

At the end of the course, the students will be able to,

| | | |
|------------|-------------------------------------------------------------------------------------------|------------|
| CO1 | Interpret the abstraction of control plane in software defined network | Understand |
| CO2 | Analyze the implications of traditional network architectures to software defined network | Analyze |
| CO3 | Develop a network function for data centre applications | Create |

| Module | Module Contents | Hours |
|--------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|
| I | Basic Networking Device and SDN Basic Packet Switching Terminology, Historical Background, The Modern Data Center, Traditional Switch Architecture, Autonomous and Dynamic Forwarding Tables in SDN | 7 |
| II | Introduction to SDN SDN Implications: Research and Innovation, Cost, Industry, Data Centre Innovation, Data Centre Needs, Real Time Case Study of Data Centre, Virtualization, Network Virtualization, Network Function Virtualization | 6 |
| III | Open Flow Protocol and SDN OpenFlow: Flow Table structure, Flowtable Actions, Flow messages, Legacy Mechanisms Evolve Toward SDN, SDN Applications, Alternate SDN Methods. | 7 |
| IV | SDN in Data Centre Data Centre Definition, Data Centre Demands, Tunneling Technologies for the Data Centre, Path Technologies in the Data Centre, Ethernet Fabrics in the Data Centre, SDN Use Cases in the Data Centre, Open SDN versus Overlays in the Data Centre, Real-World Data Centre Implementations. | 7 |
| V | Application of SDN Consistent Policy Configuration, Global Network View, Wide Area Networks, Service Provider and Carrier Networks, Campus Networks, Hospitality Networks, Mobile Networks, In-Line Network Functions, Optical Networks, SDN vs. P2P/Overlay Networks. | 6 |
| VI | Network Function Virtualization Existing Network Virtualization Framework (VMWare and others), Virtualization and Data Plane I/O, Services Engineered Path | 6 |

Course Objectives

| | |
|----------|--------------------------------------------------------------------------------------------------|
| 1 | To elaborate need of developing graphics application in visual computing |
| 2 | To introduce the algorithmic development of graphics primitives like: line, circle, polygon etc. |
| 3 | To represent and transform the media data for application development |

Course Outcomes (CO) with Bloom's Taxonomy Level

| | | |
|---------------------------------------------------------|----------------------------------------------------------|---------|
| At the end of the course, the students will be able to, | | |
| CO1 | Draw Geometric primitives using OpenGL | Analyze |
| CO2 | Implement basic transformations on objects using OpenGL. | Apply |
| CO3 | Implement clipping algorithm on lines using OpenGL. | Apply |

| Module | Module Contents | Hours |
|--------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|
| I | Graphics Primitives: Points, lines, circles and ellipses as primitives, scan conversion algorithms for primitives, Fill area primitives including scan-line polygon filling, inside-outside test, boundary and flood-fill, character generation, line attributes, area-fill attributes, character attributers. | 7 |
| II | 2D transformation : Transformations (translation, rotation, scaling), matrix representation, homogeneous coordinates, composite transformations, reflection and shearing | 6 |
| III | 2D Viewing viewing pipeline and coordinates system, window-to-viewport transformation, clipping including point clipping, line clipping (cohen-sutherland, liang- bersky, NLN), polygon clipping | 7 |
| IV | 3D concepts and object representation: 3D display methods, polygon surfaces, tables, equations, meshes, curved lies and surfaces, quadric surfaces, spline representation, cubic spline interpolation methods, Bazier curves and surfaces, B-spline curves and surfaces | 7 |
| V | 3D transformation 3D scaling, rotation and translation, composite transformation | 6 |

| | | |
|----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---|
| VI | 3D viewing: viewing pipeline and coordinates, parallel and perspective transformation, view volume and general (parallel and perspective) projection transformations | 6 |

| CO-PO Mapping | | | | | | | | | | | | | | |
|---------------|-------------------------|---|---|---|---|---|---|---|---|----|----|----|-----|---|
| | Programme Outcomes (PO) | | | | | | | | | | | | PSO | |
| | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 1 | 2 |
| CO1 | | | | | 3 | | | | | | | 1 | | |
| CO2 | | 1 | | | 2 | | | | | | | | 1 | |
| CO3 | 1 | 2 | | | | | | | | | | | | 2 |

The strength of mapping is to be written as 1,2,3; Where, 1:Low, 2:Medium, 3:High
Each CO of the course must map to at least one PO.

| Assessment |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| The assessment is based on 2 in-semester examinations in the form of T1 (Test-1) and T2 (Test-2) of 20 marks each. Also there shall be 1 End-Sem examination (ESE) of 60 marks. T1 shall be typically on modules 1 and 2, T2 based typically on modules 3, 4 and ESE shall be on all modules with nearly 50% weightage on modules 1 to 4 and 50% weightage on modules 5, 6. |

| Assessment Plan based on Bloom's Taxonomy Level | | | | |
|-------------------------------------------------|-------------|-------------|-------------|-------------|
| Bloom's Taxonomy Level | T1 | T2 | ESE | Total |
| Remember | Not Allowed | Not Allowed | Not Allowed | Not Allowed |
| Understand | 5 | 5 | 10 | 20 |
| Apply | 10 | 5 | 15 | 30 |
| Analyze | 5 | 5 | 15 | 25 |
| Evaluate | | 5 | 15 | 20 |
| Create | | | 5 | 5 |
| Total | 20 | 20 | 60 | 100 |

Walchand College of Engineering, Sangli

(Government Aided Autonomous Institute)

AY 2021-22

Course Information

| | |
|----------------------------|----------------------------------------------|
| Programme | B.Tech. (Information Technology) |
| Class, Semester | Final Year B. Tech., Sem VII |
| Course Code | 11ET414 |
| Course Name | Professional Elective 3 : System Programming |
| Desired Requisites: | Data Structures and Operating Systems |

| Teaching Scheme | | Examination Scheme (Marks) | | | |
|--------------------|------------|----------------------------|-----------|------------|--------------|
| Lecture | 3 Hrs/week | T1 | T2 | ESE | Total |
| Tutorial | - | 20 | 20 | 60 | 100 |
| Practical | - | | | | |
| Interaction | - | Credits: 3 | | | |

Course Objectives

| | |
|----------|---------------------------------------------------------------------------|
| 1 | To introduce basic concepts in systems programming. |
| 2 | To elaborate the structure and design of assemblers, linkers and loaders. |
| 3 | To define the concepts of high level programming languages |

Course Outcomes (CO) with Bloom's Taxonomy Level

| | | |
|---------------------------------------------------------|----------------------------------------------------------|---------|
| At the end of the course, the students will be able to, | | |
| CO1 | To apply the execution process of high level programming | Apply |
| CO2 | To analyze the working of compiler | Analyze |
| CO3 | To compare various compilers, linkers and loaders | Analyze |

| Module | Module Contents | Hours |
|--------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|
| I | Overview of System Software: Introduction, Software, Software Hierarchy, Systems Programming, Machine Structure, Interfaces, Address Space, Computer Languages, Tools, Life Cycle of a Source Program, Levels of System Software, Overview of Language Processors Programming Languages and Language Processors, Language Processing Activities, Program Execution, Fundamental of Language Processing, Symbol Tables | 7 |
| II | Assemblers: Elements of Assembly Language Programming, Design of the Assembler, Assembler Design Criteria, Types of Assemblers, Two-Pass Assemblers, One-Pass Assemblers, Single pass Assembler for Intel x86 , Algorithm of Single Pass Assembler, Multi-Pass Assemblers, Advanced Assembly Process, Variants of Assemblers Design of two pass assembler, | 6 |
| III | Macro and Macro Processors: Introduction, Macro Definition and Call, Macro Expansion, Nested Macro Calls, Advanced Macro Facilities, Design Of a Macro Pre-processor, Design of a Macro Assembler, Functions of a Macro Processor, Basic Tasks of a Macro Processor, Design Issues of Macro Processors, Features, Macro Processor Design Options, Two-Pass Macro Processors, One-Pass Macro Processors | 7 |
| IV | Linkers and Loaders: Introduction, Relocation of Linking Concept, Design of a Linker, Self-Relocating Programs, Linking in MSDOS, Linking of Overlay Structured Programs, Dynamic Linking, Loaders, Different Loading Schemes, Sequential and Direct Loaders, Compile-and-Go Loaders, General Loader Schemes, Absolute Loaders, Relocating Loaders, Practical Relocating Loaders, Linking Loaders, Relocating Linking Loaders, Linkers v/s Loaders | 7 |
| V | Scanning and Parsing: Programming Language Grammars, Classification of Grammar, Ambiguity in Grammatical Specification, Scanning, Parsing, Top Down Parsing, Bottom up Parsing, Language Processor Development Tools, LEX, YACC, Compilers: Causes of Large Semantic Gap, Binding and Binding Times, Data Structure used in Compiling, Scope Rules, Memory Allocation, Compilation of Expression, Compilation of Control Structure, Code Optimization | 6 |

| | | |
|---------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---|
| VI | Interpreters & Debuggers: Benefits of Interpretation, Overview of Interpretation, The Java Language Environment, Java Virtual Machine, Types of Errors, Debugging Procedures, Classification of Debuggers, Dynamic/Interactive Debugger | 6 |

B. Tech SEM-II

Walchand College of Engineering, Sangli
(Government Aided Autonomous Institute)

AY 2021-22

Course Information

| | |
|----------------------------|----------------------------------|
| Programme | B.Tech. (Information Technology) |
| Class, Semester | Final Year B. Tech., Sem VIII |
| Course Code | 4IT471 |
| Course Name | Techno-Socio Activity |
| Desired Requisites: | -- |

| Teaching Scheme | | Examination Scheme (Marks) | | | |
|--------------------|---|----------------------------|------------|------------|--------------|
| Lecture | - | LA1 | LA2 | ESE | Total |
| Tutorial | - | 30 | 30 | 40 | 100 |
| Practical | 2 | | | | |
| Interaction | - | Credits: 1 | | | |

Course Objectives

| | |
|----------|---------------------------------------------------------------------------------|
| 1 | To propose a structured and rational solution to address the relevant skills |
| 2 | To motivate students towards the desirous need of industry, economy and society |
| 3 | To provide opportunity to integrate IT based solutions with various enterprises |

Course Outcomes (CO) with Bloom's Taxonomy Level

At the end of the course, the students will be able to,

| | | |
|------------|-----------------------------------------------------------------------|----------|
| CO1 | Employ the programme for welfare of society and environment | Apply |
| CO2 | Appraise pragmatic skills for national and international competitions | Analyze |
| CO3 | Recommend and propose engineering solution for industry and community | Evaluate |

List of Experiments / Lab Activities

Assessment is based on the rubric decided by department

Student can undertake any techno-socio activity as listed below but not limited to:

1. Each student or group of students may work for the welfare of the environment, society through programmes such as tree plantation, blood donation campaigns etc.
2. Each student or group of students participating in technical events/competition/exhibition.
3. Certification of the MOOC courses (beyond syllabus) / Programming competition/ interaction with industry
4. Developing any innovative gadget / solution / system and technology transfer in the interest of Nation / Society / Institute (WCE)
5. Publishing papers /articles in national / international conferences / journals or similar contributions
6. Coordinating students' clubs / services like SAIT/WLUG/Lab administration or any other
7. Organizing techno-socio activity for the students / community in rural areas, unprivileged areas

The strength of mapping is to be written as 1,2,3; Where, 1:Low, 2:Medium, 3:High
Each CO of the course must map to at least one PO.

| Assessment | | | | |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------|---------------------|---------------------------------------------------------------------|--------------|
| There are three components of lab assessment, LA1, LA2 and Lab ESE. IMP: Lab ESE is a separate head of passing. LA1, LA2 together is treated as In-Semester Evaluation. | | | | |
| Assessment | Based on | Conducted by | Typical Schedule (for 26-week Sem) | Marks |
| LA1 | Lab activities, attendance, journal | Lab Course Faculty | During Week 1 to Week 6 Marks Submission at the end of Week 6 | 30 |
| LA2 | Lab activities, attendance, journal | Lab Course Faculty | During Week 7 to Week 12 Marks Submission at the end of Week 12 | 30 |
| Lab ESE | Lab activities, attendance, journal | Lab Course Faculty | During Week 15 to Week 18 Marks Submission at the end of Week 18 | 40 |

Week 1 indicates starting week of a semester. The typical schedule of lab assessments is shown, considering a 26-week semester. The actual schedule shall be as per academic calendar. Lab activities/Lab performance shall include performing experiments, mini-project, presentations, drawings, programming and other suitable activities, as per the nature and requirement of the lab course. The experimental lab shall have typically 8-10 experiments.

| Assessment Plan based on Bloom's Taxonomy Level | | | | |

| Class, Semester | Final Year B. Tech., Sem VIII |
| Course Code | HIT492 |
| Course Name | Project - 2 |
| Desired Requisites: | Project - 1 |

Teaching Scheme

Examination Scheme (Marks)

| Lecture | - | LA1 | LA2 | Lab ESE | Total |
|-------------|-------------|--------------------|-----|---------|-------|
| Tutorial | - | 30 | 30 | 40 | 100 |
| Practical | 16 Hrs/Week | | | | |
| Interaction | - | Credits: 08 | | | |

Course Objectives

- | | |
|---|----------------------------------------------------------------------------|
| 1 | To identify real life needs and project requirements |
| 2 | To elaborate technical solutions through latest design & development tools |
| 3 | To compare and analyze the IT platforms for efficient solutions |

Course Outcomes (CO) with Bloom's Taxonomy Level

At the end of the course, the students will be able to,

| | | |
|------------|------------------------------------------------------------------------|----------|
| CO1 | Integrate project at each stage of the software development life cycle | Apply |
| CO2 | Recommend project plans that address real-world challenges | Evaluate |
| CO3 | Develop software projects with strategic goals | Create |

List of Experiments / Lab Activities

List of Experiments:

Project is to be carried out in a group of maximum 5 to 6 students. Project is to be carried based research paper from journals.

Each group will carry out a project by developing any application software based on the following areas.

1. Application can be based on any trending new technology.
2. Application can be extension to previous projects.
3. Results of the project is to be tested and validated against standard data set.
4. Project group should achieve all the proposed objectives of the problem statement.
5. The work should be completed in all aspects of design, implementation and testing and follow software engineering practices.
6. Project reports should be prepared and submitted in soft and hard form along with the code and other dependency documents. Preferable use online code repositories (github/bitbucket)
7. Project will be evaluated continuously by the guide/panel as per assessment plan.
8. Presentation and report should use standard templates provided by department.
9. Preferably student should present/publish article.

Project report (pre-defined template) should be prepared using Latex/Word and submitted along with soft copy on CD/DVD (with code, PPT, PDF, Text report document & reference material) or on an online repository.

Students should maintain a project log book containing weekly progress of the project.

Course Objectives

| | |
|----------|----------------------------------------------------------------|
| 1 | To introduce time complexity issue & balanced search trees |
| 2 | To impart advanced knowledge of Graph and Heap data structures |
| 3 | To compare data structures and algorithms in real applications |

Course Outcomes (CO) with Bloom's Taxonomy Level

| | | |
|---------------------------------------------------------|----------------------------------------------------------|----------|
| At the end of the course, the students will be able to, | | |
| CO1 | Solve real world problems using advanced data structures | Apply |
| CO2 | Compare different data structures | Analyse |
| CO3 | Evaluate time complexity of different algorithms | Evaluate |

| Module | Module Contents | Hours |
|--------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|
| I | Data Structure and Time Complexity: Review of Basic Concepts: Abstract data types, Algorithms, Big Oh, Small Oh, Omega and Theta notations, Solving recurrence equations, Data structures & its effect on time complexity, Iterative Vs Recursive coding, amortized analysis. | 6 |
| II | Advance Tree Structures: Binary Trees, Binary search trees, Threaded Binary trees, Height balanced AVL trees, Splay trees: A self-Adjusting-Data Structure. | 7 |
| III | Heaps: Balanced Search Trees as Heaps, Array-Based Heaps, Heap-Ordered Trees and Half-Ordered Trees, Leftist Heaps, Skew Heaps, Binomial Heaps, Changing Keys in Heaps, Fibonacci Heaps, Double-Ended Heap Structures and Multidimensional Heaps | 7 |
| IV | Tree Data Structure Applications: Multiway Trees, Lexicographical Search Trees: Tries, External Searching: B & B+ Trees, Redblack trees, Tree Structured Programs: Look –Ahead in Games. | 7 |
| V | Hashing: Basic Hash Tables and Collision Resolution, Universal Families of Hash Functions, Perfect Hash Functions, Hash Trees, Extendible Hashing, Membership Testers and Bloom Filters. | 6 |
| VI | Selected Problems: Graph Problems – Network flows: Max flow – mincut theorem, Probabilistic methods – Markov's inequality, Dynamic Graph Problems. | 7 |

|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|--|--|--|--|--|--|--|--|--|--|--|--|--|
| Assessment | | | | | | | | | | | | | | |
| The assessment is based on 2 in-semester examinations in the form of T1 (Test-1) and T2 (Test-2) of 20 marks each. Also there shall be 1 End-Sem examination (ESE) of 60 marks. T1 shall be typically on modules 1 and 2, T2 based typically on modules 3, 4 and ESE shall be on all modules with nearly 50% weightage on modules 1 to 4 and 50% weightage on modules 5, 6. | | | | | | | | | | | | | | |

| | | | | |

AY 2021-22

Course Information

| | |
|----------------------------|----------------------------------------------------------------------------|
| Programme | B.Tech. (Information Technology) |
| Class, Semester | Final Year, B.Tech Sem VIII |
| Course Code | LET 433 |
| Course Name | Professional Elective 4 :Soft Computing |
| Desired Requisites: | Artificial Intelligence, Programming Languages and tool like Matlab/Scilab |

| Teaching Scheme | | Examination Scheme (Marks) | | | |
|------------------------|----------|-----------------------------------|-----------|------------|--------------|
| Lecture | 3hr/Week | T1 | T2 | ESE | Total |
| Tutorial | -- | 20 | 20 | 60 | 100 |
| Practical | -- | | | | |
| Interaction | -- | | | | |

Credits: 3

Course Objectives

| | |
|----------|-----------------------------------------------------------------------------------|
| 1 | To introduce various component of soft computing |
| 2 | To impart soft computing concepts to solve engineering and optimization problems. |
| 3 | To elaborate swarm intelligence methods |

Course Outcomes (CO) with Bloom's Taxonomy Level

At the end of the course, the students will be able to,

| | | |
|------------|--------------------------------------------------------|----------|
| CO1 | Classify hard and soft computing concepts | Apply |
| CO2 | Compare the working of swarm intelligence methods | Analyze |
| CO3 | Justify the soft computing technique for given problem | Evaluate |

| Module | Module Contents | Hours |
|---------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|
| I | Introduction History, Scope of Soft Computing, components of Soft Computing- Neural Networks, Application scope of ANN, Fuzzy Logic, Genetic algorithm, Swarm Intelligence, Hybrid System, Hard vs. Soft Computing. | 5 |
| II | Artificial neural network (ANN) Fundamental Concept, Evolution of Neural network, Basic models of ANN, important terminologies of ANN, Mc-Culloch Pitts Neuron, Linear separability, AND,OR, EXOR problem solving by ANN, Supervised Learning, Unsupervised Learning, Application to ANN to real world problem. | 7 |
| III | Genetic algorithms (GA) Introduction, basic operators and Terminologies in GA, Genetic operators – Selection, cross-over, reproduction and mutation – fitness function, traditional vs. Genetic algorithm, simple genetic algorithm, general genetic algorithm, the schema theorem, classification of GA, Genetic programming. Application to GA to real world problem. | 7 |
| IV | Introduction to classical set and fuzzy sets Introduction, Classical set (crisp set) Fuzzy sets and their properties, Fuzzy models, Membership function, Defuzzification. Application to Fuzzy logic to real world problem. | 6 |
| V | Swarm intelligence (SI) Ant colony optimization (ACO). Swarm as a multi-agent system, Distributed coordination and group communication, Particle Swarm Optimization (PSO), Differential Evolution (DE), Harmony search (HS), Bacteria Foraging Optimization (BFO), Artificial Bee Colony algorithm (ABC), Biogeography-Based Optimization (BBO), Gravitational Search Algorithm (GSA), Grenade Explosion Method (GEM) Teaching Learning Based Optimization Algorithm (TLBO). | 8 |

| | | |
|---------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---|
| VI | Applications of soft computing Hybrid System, Applications in image processing, optimization of TSP using GA/ANN, GA based Internet search technique, soft computing based hybrid fuzzy controller, Application of soft computing in multiple disciplines. Top research article in soft computing from high reputed journals. | 6 |

Credits: 3

Course Objectives

| | |
|----------|------------------------------------------------------------------------|
| 1 | To introduce the paradigm shift technique, deep learning into students |
| 2 | To elaborate the deep learning methods in real world applications |
| 3 | To explain deep learning concepts |

Course Outcomes (CO) with Bloom's Taxonomy Level

At the end of the course, the students will be able to,

| | | |
|------------|-----------------------------------------------------------------------------------------|---------|
| CO1 | Compare the deep learning models | Analyze |
| CO2 | Identify the optimization techniques in deep learning | Analyze |
| CO3 | Implement deep learning techniques for natural language processing and computer vision. | Apply |

| Module | Module Contents | Hours |
|--------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|
| I | Fundamentals of Neural Networks: McCulloch Pitts Neuron, Thresholding Logic, Perceptrons, Perceptron Learning Algorithm, Multilayer Perceptrons (MLPs), Representation Power of MLPs, Sigmoid Neurons, Gradient Descent, Feedforward Neural Networks, Representation Power of Feedforward Neural Networks. Backpropagation algorithm. | 7 |
| II | Optimizations in Gradient Descent: Gradient Descent (GD), Momentum Based GD, Nesterov Accelerated GD, Stochastic GD, AdaGrad, RMSProp, Adam, Bais correction in Adam. | 6 |
| III | Regularization: Regularization: Bias Variance Trade off, L2 regularization, Early stopping, Data-set augmentation, Parameter sharing and tying, Injecting noise at input, Ensemble methods, Dropout. Greedy Layer wise Pre-training, Better activation functions, Better weight initialization methods, Batch Normalization. | 7 |
| IV | Deep Learning for word encoding-Natural Language Processing: Eigen values and eigen vectors, Basis, Principal Component Analysis and its interpretations, Singular Value Decomposition, Learning Vectorial Representations Of Words: One hot representation of words, SVD for learning word representation. | 7 |
| V | Convolutional Neural Networks for Computer Vision: Convolutional Neural Networks, LeNet, AlexNet, ZF-Net, VGGNet, GoogLeNet, ResNet, Visualizing Convolutional Neural Networks, Guided Backpropagation, Deep Dream, Deep Art, Fooling Convolutional Neural Networks | 6 |
| VI | Recurrent Neural Networks: Recurrent Neural Network, Back Propagation through time(BPTT), Vanishing and Exploding Gradients, Truncated BPTT, GRU, LSTM. | 7 |
