

**Final Year B. Tech 2023-24**  
**Department of Information Technology**  
**Odd Semester**

Walchand College of Engineering, Sangli (Government Aided Autonomous Institute)					
AY 2023-24					
Course Information					
<b>Programme</b>	B.Tech. (Information Technology)				
<b>Class, Semester</b>	Final Year B. Tech., Sem VII				
<b>Course Code</b>	5IT401				
<b>Course Name</b>	Data Mining				
<b>Desired Requisites:</b>					
Teaching Scheme		Examination Scheme (Marks)			
<b>Lecture</b>	2 Hrs/week	<b>MSE</b>	<b>ISE</b>	<b>ESE</b>	<b>Total</b>
<b>Tutorial</b>	-	30	20	50	100
	-	<b>Credits: 2</b>			
Course Objectives					
<b>1</b>	To introduce basic concepts, principles and techniques of data mining				
<b>2</b>	To make students to develop skills to use and implement data mining tools				
<b>3</b>	To handle and propose solution to real world problem.				
Course Outcomes (CO) with Bloom's Taxonomy Level					
At the end of the course, the students will be able to,					
<b>CO</b>	<b>Course Outcome Statement/s</b>			<b>Bloom's Taxonomy Level</b>	<b>Bloom's Taxonomy Description</b>
<b>CO1</b>	Summarize the basic concepts, techniques and algorithms of Data Mining			II	Understanding
<b>CO2</b>	Apply skills of using data mining techniques for solving real life problems			III	Applying
<b>CO3</b>	Recognise real world problems for independent study and research			V	Evaluating
<b>Module</b>	<b>Module Contents</b>				<b>Hours</b>
I	<b>Introduction : Basic Concepts in Data Mining</b> Data mining background, classification of Data Mining, Data Mining Techniques. Data Pre-processing, Applications				4
II	<b>Data Mining Primitives</b> Data Mining Primitives, Architecture of Data Mining, Knowledge representation, Data generalization & summarization.				4
III	<b>Association Rule mining,</b> Frequent item set generation,, Association Rule generation, correlation analysis, constraint based Association mining.				5
IV	<b>Classification &amp; Prediction</b> Issues, Decision Tree, Bayesian classifier, Back propagation, Classification methods, Prediction, ensemble classification				5
V	<b>Cluster analysis</b> similarity metrics, Clustering methods, (partitioning based, hierarchical based, density based, grid based),				4
VI	<b>Introduction to Mining Complex Data sets</b> Mining spatial data, temporal data, Mining time series, mining text datasets, web mining				4

<b>Text Books</b>

<b>CO-PO Mapping</b>																
	<b>Programme Outcomes (PO)</b>												<b>PSO</b>			
	1	2	3	4	5	6	7	8	9	10	11	12	1	2	3	
<b>CO1</b>	1	2						1								
<b>CO2</b>	3										2	2				
<b>CO3</b>			2		3			2								
<b>CO4</b>																
<p>The strength of mapping is to be written as 1: Low, 2: Medium, 3: High  Each CO of the course must map to at least one PO.</p>																

<b>Assessment</b>
<p>The assessment is based on MSE, ISE and ESE.  MSE shall be typically on modules 1 to 3.  ISE shall be taken throughout the semester in the form of teacher’s assessment. Mode of assessment can be field visit, assignments etc. and is expected to map at least one higher order PO.  ESE shall be on all modules with around 40% weightage on modules 1 to 3 and 60% weightage on modules 4 to 6.  For passing a theory course, Min. 40% marks in (MSE+ISE+ESE) are needed and Min. 40% marks in ESE are needed. (ESE shall be a separate head of passing)</p>

AY 2023-24					
Course Information					
<b>Programme</b>	B.Tech. (Information Technology)				
<b>Class, Semester</b>	Final Year B. Tech., Sem. VII				
<b>Course Code</b>	5IT402				
<b>Course Name</b>	Cryptography & Network Security				
<b>Desired Requisites:</b>	Computer Networks				
Teaching Scheme		Examination Scheme (Marks)			
<b>Lecture</b>	2 Hrs/week	<b>MSE</b>	<b>ISE</b>	<b>ESE</b>	<b>Total</b>
<b>Tutorial</b>	1 Hrs/week	30	20	50	100
	-	<b>Credits: 3</b>			
Course Objectives					
<b>1</b>	To describe the fundamental concepts of network security using confidentiality, integrity and availability (CIA) of the information				
<b>2</b>	To impart various encryption techniques				
<b>3</b>	To apprise security mechanisms and services against threats				
Course Outcomes (CO) with Bloom's Taxonomy Level					
At the end of the course, the students will be able to,					
<b>CO</b>	<b>Course Outcome Statement/s</b>	<b>Bloom's Taxonomy Level</b>	<b>Bloom's Taxonomy Description</b>		
<b>CO1</b>	Generalize information security aspects and outline CIA requirements	II	Understanding		
<b>CO2</b>	Practice various encryption algorithms by examining crypt-complexity	III	Applying		
<b>CO3</b>	Compare access control mechanisms and authentication services resolving the security issues	IV	Analysing		
<b>Module</b>	<b>Module Contents</b>				<b>Hours</b>
I	<b>Security Overview:</b> Services, Mechanism and Attacks, The OSI Security Architecture, Classical Encryption Techniques, Substitution Techniques, Transposition Techniques, Steganography				4
II	<b>Block Cipher:</b> Block Cipher Design Principles, Modes of Data Transfer, Symmetric Cipher Model, Data Encryption Standard, Security of 2DES, 3DES & AES				4
III	<b>Public Key Encryption:</b> Principles of Public-Key Cryptosystem, RSA Algorithm, Distribution of Public Keys, Diffie-Hellman Key Exchange				5
IV	<b>Authentication Functions and Services:</b> Hash Functions, Message Authentication Codes, Digital Signatures Kerberos, X.509 Certificates				4
V	<b>IP &amp; Web Security:</b> IP Security Architecture, Authentication Header, Encapsulating Security Payload, Combining Security Associations Web Security Considerations, Secure Socket Layer and Transport Layer Security, Secure Electronic Transaction				4
VI	<b>Perimeter Security:</b> Intruders, Intruder Detection, Password Management, Malwares Firewall Configurations, Trusted Systems, Honeypots				5

**Walchand College of Engineering, Sangli**  
(Government Aided Autonomous Institute)

**AY 2023-24**

**Course Information**

<b>Programme</b>	B.Tech. (Information Technology)
<b>Class, Semester</b>	Final Year, Sem-VII
<b>Course Code</b>	5IT403
<b>Course Name</b>	Humanities-4: Legal, IPR and Safety
<b>Desired Requisites:</b>	

Teaching Scheme		Examination Scheme (Marks)			
<b>Lecture</b>	1 Hrs/week	<b>T1</b>	<b>T2</b>	<b>ESE</b>	<b>Total</b>
<b>Tutorial</b>	-	10	10	30	50
<b>Practical</b>	-				
<b>Interaction</b>	-	<b>Credits: 1</b>			

**Course Objectives**

<b>1</b>	To disseminate fundamental aspects of Legal, IPR and Safety
<b>2</b>	To provide awareness of IPR and government policies
<b>3</b>	To propagate IPR as tangible property

**Course Outcomes (CO) with Bloom's Taxonomy Level**

At the end of the course, the students will be able to,

CO	Course Outcome Statement/s	Bloom's Taxonomy Level	Bloom's Taxonomy Description
<b>CO1</b>	Identify the intellectual work and apply IPR	III	Applying
<b>CO2</b>	Analyse the intellectual work for economical, moral, ethical issues and social importance of tangible property	IV	Analysing
<b>CO3</b>	Distinguish and Explain various forms of IPRs	IV	Analysing

Module	Module Contents	Hours
I	<b>Module 1: Fundamentals of IPR(Intellectual Property right)</b> Introduction to IPR: Definition, Types of IPR, IPR Acts, Nature of Intellectual Property right(IPR) protection of IP, IPR and Economic Development, Instruments relating to the protection of IP:Berne Convention, Paris Convention, TRIPS, The Patents Act, 1970 overview.	2
II	<b>Module 2: Patent and patentability</b> Introduction to patent: Definition, concepts, Patentability Criteria: How to Identify whether my invention is patentable?,Criteria for obtaining patents: Novelty, Inventive step, Utility, Non patentable inventions, Patentability checking tools, Prior art and patent. (Section 3 of , The Patents Act, 1970 )	3
III	<b>Module 3: Patents procedures and filing</b> Procedure for registration/filing (forms) , Term of patent , Rights of patentee, Basic concept of Compulsory license and Government use of patent, Infringement of patents and remedies. Important sections of form2. Drafting patents and claims.	2

IV	<b>Module 4: Copyright, Trademark, Designs and Geographical Indication(GI)</b> Copy right :Ownership of copyright, Term of copyright, Rights of owner: Economic Rights, Moral Rights, Assignment and license of rights, Performers rights and Broadcasters rights, Infringement of copyright, Fair use and Fair Dealing concepts Trademark: Categories of Trademark: Certification Mark, Collective Mark , Well known Mark and Non-conventional Marks, Concept of distinctiveness, Doctrine honest user, registration and protection. Design: Concept of original design, Difference between GI and Trade Marks, Concept of Authorized user, GI: Homonymous GI.	2
V	<b>Module 5: Patent Licensing</b> Compulsory Licensing; Compulsory Licensing—Working of Patents, Grounds for Grant of Compulsory License, Revocation; Patent Licensing.	2
VI	<b>Module 6: Important acts and laws</b> The Information Technology Act, 2000 overview and Cyber law in India, General Data Protection Regulations	2

<b>Programme</b>	B.Tech. (Information Technology)				
<b>Class, Semester</b>	Final Year B. Tech., Sem VII				
<b>Course Code</b>	5IT451				
<b>Course Name</b>	Data Mining Lab				
<b>Desired Requisites:</b>	Basic computer programming, Statistics				
<b>Teaching Scheme</b>		<b>Examination Scheme (Marks)</b>			
<b>Practical</b>	2 Hrs/Week	<b>LA1</b>	<b>LA2</b>	<b>Lab ESE</b>	<b>Total</b>
<b>Interaction</b>	-	30	30	40	100
	-	<b>Credits: 1</b>			
<b>Course Objectives</b>					
<b>1</b>	To demonstrate basic concepts of data processing				
<b>2</b>	To introduce data mining algorithm				
<b>3</b>	To apply data mining algorithms for real world problem				
<b>Course Outcomes (CO) with Bloom's Taxonomy Level</b>					
At the end of the course, the students will be able to,					
<b>CO</b>	<b>Course Outcome Statement/s</b>			<b>Bloom's Taxonomy Level</b>	<b>Bloom's Taxonomy Description</b>
<b>CO1</b>	Summarize data processing tools			III	Applying
<b>CO2</b>	Implement data mining algorithms			IV	Analysing
<b>CO3</b>	Evaluate feasibility of data mining algorithm to various data types			V	Evaluating
<b>List of Experiments / Lab Activities</b>					

**List of Experiments:**

- Experiment 1: Perform data smoothing.  
 Experiment 2: Perform data transformation.  
 Experiment 3: Perform data normalization.  
 Experiment 4: Finding summary for dataset.  
 Experiment 5: Plotting various types of graphs from dataset.  
 Experiment 6: Data Preparation and Exploration Visualization Techniques  
 Experiment 7: Performance Metrics and Assessment Metrics for Prediction and Classification  
 Experiment 8: Supervised Learning Methods Classification  
 Experiment 9: Supervised Learning Methods Logistic Regression  
 Experiment 10: Unsupervised Learning Methods : Association Rules  
 Experiment 11: Unsupervised Learning Methods : Cluster Analysis  
 Experiment 12: Perform various data mining tasks using WEKA and KNIME OSS  
 Experiment 13: Using some sample data sets implement and test data mining techniques.

**CO-PO Mapping**

	Programme Outcomes (PO)												PSO			
	1	2	3	4	5	6	7	8	9	10	11	12	1	2	3	
<b>CO1</b>	2				1											
<b>CO2</b>		3									1	2				
<b>CO3</b>			3		2		2									
<b>CO4</b>																

The strength of mapping is to be written as 1,2,3; where, 1: Low, 2: Medium, 3: High  
 Each CO of the course must map to at least one PO, and preferably to only one PO.

**Assessment**

There are three components of lab assessment, LA1, LA2 and Lab ESE.  
 IMP: Lab ESE is a separate head of passing.(min 40 %), LA1+LA2 should be min 40%

Assessment	Based on	Conducted by	Typical Schedule	Marks
LA1	Lab activities, attendance, journal	Lab Course Faculty	During Week 1 to Week 8 Marks Submission at the end of Week 8	30

LA2	Lab activities, attendance, journal	Lab Course Faculty	During Week 9 to Week 16 Marks Submission at the end of Week 16	30
Lab ESE	Lab activities, journal/ performance	Lab Course Faculty and External Examiner as applicable	During Week 18 to Week 19 Marks Submission at the end of Week 19	40
<p>Week 1 indicates starting week of a semester. Lab activities/Lab performance shall include performing experiments, mini-project, presentations, drawings, programming, and other suitable activities, as per the nature and requirement of the lab course. The experimental lab shall have typically 8-10 experiments and related activities if any.</p>

Course Information					
<b>Programme</b>	B.Tech. (Information Technology)				
<b>Class, Semester</b>	Final Year B. Tech., Sem VII				
<b>Course Code</b>	5IT452				
<b>Course Name</b>	Open Source Software Lab				
<b>Desired Requisites:</b>	Unix Operating Systems, Software Engineering, Computer Network, Web Technology				
Teaching Scheme		Examination Scheme (Marks)			
<b>Practical</b>	2 Hrs/week	<b>LA1</b>	<b>LA2</b>	<b>Lab ESE</b>	<b>Total</b>
<b>Interaction</b>	1 Hr	30	30	40	100
<b>Credits: 2</b>					
Course Objectives					
<b>1</b>	To configure the open source software				
<b>2</b>	To contribute or develop software in open source environment				
<b>3</b>	To use FOSS for software engineering				
Course Outcomes (CO) with Bloom's Taxonomy Level					
At the end of the course, the students will be able to,					
CO	Course Outcome Statement/s			Bloom's Taxonomy Level	Bloom's Taxonomy Description
<b>CO1</b>	Exercise the FOSS tools in software development			III	Applying
<b>CO2</b>	Analyze the economics of FOSS			IV	Analysing
<b>CO3</b>	Create new FOSS or Contribute to existing FOSS			VI	Creating
Module	Module Contents				Hours
I	<b>Introduction</b> Introduction to open sources- Need of Open Sources- Advantages of Open Sources-Applications of Open Sources- commercial aspects of Open source movement, Notion of Community, Guidelines for effectively working with FOSS community, Benefits of Community based Software Development Requirements for being open, free software, open source software, FOSS Licensing Models –GPL, AGPL, LGPL, FDL, Economy of FOSS, History of Linux, Kernel Versions.				3
	<b>Open source development and FOSS languages</b> Proprietary software development model vs. Open Source software development model, models for FOSS- Cathedral model and Bazaar model. Software package management: RPM, DEB – building.				
II	<b>Introduction to collaborative development</b> Developer communities, mailing lists, IRC, wiki, version control (git/github), bug tracking, handling non-technical issues, localization, accessibility, documentation FOSS code by doxygen.				2
III	<b>Open source Virtualization and FOSS</b> Containerization technologies: docker, Container Images, alternative to virtualization: rocket, etc, Containerization of FOSS tools				2
IV	<b>Configuration of Network services</b> DHCP, DNS, WINES, NFS, NIS, Web server, Ftp Server, Telnet Server, etc. GUI configuration tools: webmin or usermin.				2
V	<b>Web Server Tools and FOSS CMS</b> Installation and Administration of Web Servers- LAMP, XAMPP, Apache, mysql, etc. Installation of Content Management Systems – WordPress, Joomla, Drupal, Moodle, MaheraXoops, Magento, social networking.				2

<b>List of Experiments / Lab Activities</b>	
	<ol style="list-style-type: none"> <li>1. Compare the various Linux Distributions and their usage</li> <li>2. Comparison of various Open Source tools : Project management</li> <li>3. Comparison of various Open Source tools: bug tracking</li> <li>4. Comparison of various Open Source tools: version control system</li> <li>5. Comparison of various Open Source tools: CMS</li> <li>6. Compilation and installation of Linux Kernel</li> <li>7. Creation Of RPM/DEB packages</li> <li>8. Excise the development of Open Source Software:-Develop simple software for basic needs such as calculator, editor or any small noticeable contribution in existing FOSS.</li> <li>9. Configuration of Server based services and their uses</li> <li>10. Docker container : An open source software development platform</li> </ol>

CO3												2		
The strength of mapping is to be written as 1,2,3; where, 1: Low, 2: Medium, 3: High Each CO of the course must map to at least one PO, and preferably to only one PO.														
List of Experiments / Lab Activities														

**Assessment is based on the rubric decided by department**

Student can undertake any techno-socio activity as listed below but not limited to:

1. Each student or group of students may work for the welfare of the environment, society through programmes such as tree plantation, blood donation campaigns etc.
2. Each student or group of students participating in technical events/competition/exhibition.
3. Certification of the MOOC courses (beyond syllabus) / Programming competition/ interaction with industry
4. Developing any innovative gadget / solution / system and technology transfer in the interest of Nation / Society / Institute (WCE)
5. Publishing papers /articles in national / international conferences / journals or similar contributions
6. Coordinating students' clubs / services like SAIT/WLUG/Lab administration or any other
7. Organizing techno-socio activity for the students / community in rural areas, unprivileged areas

Assessment				
There are three components of lab assessment, LA1, LA2 and Lab ESE. IMP: Lab ESE is a separate head of passing.(min 40 %), LA1+LA2 should be min 40%				
Assessment	Based on	Conducted by	Typical Schedule	Marks
LA1	Lab activities, attendance, journal	Lab Course Faculty	During Week 1 to Week 8 Marks Submission at the end of Week 8	30
LA2	Lab activities, attendance, journal	Lab Course Faculty	During Week 9 to Week 16 Marks Submission at the end of Week 16	30
Lab ESE	Lab activities, journal/ performance	Lab Course Faculty and External Examiner as applicable	During Week 18 to Week 19 Marks Submission at the end of Week 19	40
Week 1 indicates starting week of a semester. Lab activities/Lab performance shall include performing experiments, mini-project, presentations, drawings, programming, and other suitable activities, as per the nature and requirement of the lab course. The experimental lab shall have typically 8-10 experiments and related activities if any.

**AY 2023-24**

**Course Information**

<b>Programme</b>	B.Tech. (Information Technology)
<b>Class, Semester</b>	Final Year B. Tech., Sem VII
<b>Course Code</b>	5IT491
<b>Course Name</b>	Project I
<b>Desired Requisites:</b>	

**Teaching Scheme**

**Examination Scheme (Marks)**

<b>Practical</b>	6 Hrs/Week	<b>LA1</b>	<b>LA2</b>	<b>Lab ESE</b>	<b>Total</b>
<b>Interaction</b>	-	30	30	40	100
<b>Credits: 3</b>					

**Course Objectives**

- |          |   |
|----------|---|
| <b>1</b> | To help students to identify real life needs and discuss project requirements.      |
| <b>2</b> | To give technical solutions through latest design & development tools.              |
| <b>3</b> | To direct students to compare and analyze the IT platforms for efficient solutions. |

**Course Outcomes (CO) with Bloom's Taxonomy Level**

At the end of the course, the students will be able to,

<b>CO</b>	<b>Course Outcome Statement/s</b>	<b>Bloom's Taxonomy Level</b>	<b>Bloom's Taxonomy Description</b>
<b>CO1</b>	Integrate project at each stage of the software development life cycle	III	Applying
<b>CO2</b>	Recommend project plans that address real-world challenges	V	Evaluating
<b>CO3</b>	Develop successful software projects that support program's strategic goals and satisfies the customer needs	VI	Creating

**List of Experiments / Lab Activities**

### List of Experiments:

Project is to be carried out in a group of maximum 5 to 6 students.

Each group will carry out a project by developing any application software based on the following areas.

1. Application can be based on any trending new technology.
2. Application can be extension to previous projects.
3. Project group should achieve all the proposed objectives of the problem statement.
4. The work should be completed in all aspects of design, implementation and testing and follow software engineering practices.
5. Project reports should be prepared and submitted in soft and hard form along with the code and other dependency documents. Preferable use online code repositories (github/bitbucket)
6. Project will be evaluated continuously by the guide/panel as per assessment plan.
7. Presentation and report should use standard templates provided by department.

Project report (pre-defined template) should be prepared using Latex/Word and submitted along

with soft copy on CD/DVD (with code, PPT, PDF, Text report document & reference material) or

on an online repository.

Students should maintain a project log book containing weekly progress of the project.

<b>CO2</b>		1													1
<b>CO3</b>												3	3		

The strength of mapping is to be written as 1: Low, 2: Medium, 3: High  
Each CO of the course must map to at least one PO.

<b>Assessment</b>
<p>The assessment is based on MSE, ISE and ESE. MSE shall be typically on modules 1 to 3. ISE shall be taken throughout the semester in the form of teacher’s assessment. Mode of assessment can be field visit, assignments etc. and is expected to map at least one higher order PO. ESE shall be on all modules with around 40% weightage on modules 1 to 3 and 60% weightage on modules 4 to 6. For passing a theory course, Min. 40% marks in (MSE+ISE+ESE) are needed and Min. 40% marks in ESE are needed. (ESE shall be a separate head of passing)</p>

<b>Course Name</b>	Professional Elective - 3: Digital Image Processing				
<b>Desired Requisites:</b>					
Teaching Scheme		Examination Scheme (Marks)			
<b>Lecture</b>	3 Hrs/week	<b>MSE</b>	<b>ISE</b>	<b>ESE</b>	<b>Total</b>
<b>Tutorial</b>	-	30	20	50	100
	-	<b>Credits: 3</b>			
Course Objectives					
<b>1</b>	To explain image fundamentals and mathematical transforms for image processing				
<b>2</b>	To describe and explain image enhancement techniques				
<b>3</b>	To elaborate image processing applications				
Course Outcomes (CO) with Bloom's Taxonomy Level					
At the end of the course, the students will be able to,					
<b>CO</b>	<b>Course Outcome Statement/s</b>			<b>Bloom's Taxonomy Level</b>	<b>Bloom's Taxonomy Description</b>
<b>CO1</b>	Discuss fundamental concepts of a digital image processing system			II	Understanding
<b>CO2</b>	Interpret image segmentation and representation techniques			III	Applying
<b>CO3</b>	Analyze images in the frequency domain using various transforms			IV	Analysing
<b>Module</b>	<b>Module Contents</b>				<b>Hours</b>
I	<b>Introduction and Pixel Relationship</b> Need for Image Processing ,Some Applications of Image Processing- Fundamental steps in DIP, Components of digital image processing, sampling, quantization, Pixel Relationships in images, Distance measurements, Data structure for image representation				7
II	<b>Image Operations and Interpolations</b> Arithmetic operations, Logical operations, Geometrical operations , Image interpolation techniques				7
III	<b>Image Transformation</b> Need of transformation, DFT and properties, convolution Theorem, DCT				6
IV	<b>Image Enhancement</b> Point operations ,Spatial filtering techniques, Frequency domain filtering				6
V	<b>Image Segmentation</b> Classification of Image segmentation, Edge detection, Thresholding techniques, Region growing techniques				7
VI	<b>Image Morphology</b> Mathematical Morphology, structuring elements, Dilation, erosion, opening, closing operations, properties of morphological operations.				6

Course Objectives					
<b>1</b>	To understand the fundamental concepts of project management and planning				
<b>2</b>	To understand the processes in the knowledge areas and inter dependencies between them				
<b>3</b>	To use hands on different tools to ensure the smooth planning and execution				
Course Outcomes (CO) with Bloom's Taxonomy Level					
At the end of the course, the students will be able to,					
<b>CO</b>	<b>Course Outcome Statement/s</b>			<b>Bloom's Taxonomy Level</b>	<b>Bloom's Taxonomy Description</b>
<b>CO1</b>	Understand the concepts of Project Management for planning to execution of projects			II	Understanding
<b>CO2</b>	Identify the resources needed for each stage, including involved stakeholders and tools			III	Applying
<b>CO3</b>	Plan and manage the scope, cost, timing, and quality of the project			III	Applying
<b>Module</b>	<b>Module Contents</b>				<b>Hours</b>
I	<b>Introduction to Software Project Management</b> Project, project management(PM), role of project manager, project management profession, system view of PM, organization, stakeholders, project phases and lifecycle, context of IT projects, process groups, mapping process groups to knowledge areas				3
II	<b>Project Integration and Scope Management</b> Strategic planning and project selection, preliminary scope statements, project management plans, project execution, monitoring and controlling project work, integrated change control, closing project, software assistance scope planning and scope management plan, scope definition and project scope statement, creating the work breakdown structure, scope verification and control, software assistance				2
III	<b>Project Time and Cost Management</b> Importance of project schedules, activity - definition, sequencing, resource estimating, duration estimating; schedule development and control, software assistance Importance, basic principles, cost estimating, budgeting and control, software assistance				2
IV	<b>Project Quality and Human Resource Management</b> Quality planning, assurance and control tools and techniques, modern quality management and improving IT project quality, software assistance, keys to managing people, human resource planning, acquiring, developing and managing project team				2

V	<b>Project Communication and Risk Management</b> Communication planning, information distribution, performance reporting, managing stakeholders, risk management planning, sources of risk, risk identification, qualitative and quantitative risk analysis, risk response planning, risk monitoring and control	2
VI	<b>Project Procurement Management</b> planning purchases and acquisitions, planning contracting, requesting seller responses, selecting sellers, administering the contract, closing the contract Tools used – JIRA, Agile Methodology, Network diagrams, GitHub, GitLab	2

#### List of Experiments / Lab Activities

1. Surveying of common project management tools and techniques and preparing a report on it
2. Developing the project charter for the project topic
3. Collecting functional and behavioural requirements using different techniques
4. Developing project schedule using network model diagram
5. Developing entire schedule of project by estimating activity resources and estimated time
6. Preparing the cost estimate by using different cost estimation techniques
7. Developing the project quality document
8. Developing communication management plan for the project
9. Identifying the risk involved in the project and preparing a risk portfolio document
10. Developing the SOW for the procurement of the project

<b>CO1</b>	Demonstrate use of automation testing tools			III	Applying
<b>CO2</b>	Implement project management techniques like planning, risk analysis, scheduling.			III	Applying
<b>CO3</b>	Evaluate software development life cycle using Agile tools and DevOps.			V	Evaluating
Module	Module Contents				Hours
I	<b>Software Testing Introduction:</b> Introduction, Importance of Software testing, How to conduct Software testing, Basic terminology of Software testing, Manual Testing Process, Difference between Manual and Automated Testing, Software testing Roles and Responsibilities, V Model of Software Development				7
II	<b>Test Case Design Techniques:</b> Static Techniques, Dynamic Techniques, Black-box Test Techniques, White-box Test Techniques, Experience-based Test Techniques, Levels of Software Testing, Test Driven Development				6
III	<b>Types of Software Testing:</b> <b>i) Functional Testing:</b> Unit Testing, Integration Testing, System Testing, User Acceptance Testing, Sanity/Smoke Testing, Regression Testing. <b>ii) Non Functional Testing:</b> Performance Testing. (Load, Stress, Spike and Endurance Testing), Usability Testing, Compatibility Testing, Reliability Testing, Security Testing				7
IV	<b>Project Management:</b> Software Product Management, Requirements Analysis/Design, Planning and Scheduling, Monitoring, Risk Analysis, Project Leadership, Teamwork, Project Organization and Team Structures, Resource Allocation, Software Quality Management Software Testing Standards				6

V	<b>Agile testing:</b> The Fundamentals of Agile Software Development, Extreme Programming, Aspects of Agile Approaches, The Differences between Testing in Traditional and Agile Approaches, Status of Testing in Agile Projects, Role and Skills of a Tester in an Agile Team, Agile Testing Methods, Assessing Quality Risks and Estimating Test Effort, Techniques in Agile Projects, Tools in Agile Projects, JIRA Tool, Scum	6
VI	<b>DevOps Testing:</b> DevOps, Version control with Git, Git, Jenkins, Maven, Integration with Jenkins, Continuous Integration and Continuous Delivery CI/CD: Jenkins Creating pipelines, Setting up runners Containers and container orchestration (Docker and Kubernetes) or application development and deployment.	7

#### List of Experiments / Lab Activities

##### List of Experiments:

1. Demonstrate Debugging Tool.
2. Implement White Box Testing(Manual)
3. Implement Black Box Testing(Manual)
4. Implement Unit Testing(Automated): TestNG
5. Implement Performance Testing(Automated) using JMetre:
6. Demonstrate Test Management Tool:TestStuff
7. Demonstrate Test Management Tool:TestLink
8. Demonstrate Web-Test Automation Tool- Selenium IDE
9. Demonstrate Web-Test Automation Tool- Selenium Web-Driver
10. Demonstrate Project Management Tool:JIRA
11. Implement Test automation using DevOps.
12. Demonstrate project life cycle using Agile framework.

<b>2</b>	To give technical solutions through latest design & development tools.				
<b>3</b>	To direct students to compare and analyze the IT platforms for efficient solutions.				
Course Outcomes (CO) with Bloom's Taxonomy Level					
At the end of the course, the students will be able to,					
CO	Course Outcome Statement/s	Bloom's Taxonomy Level	Bloom's Taxonomy Description		
CO1	Integrate project at each stage of the software development life cycle	III	Applying		
CO2	Recommend project plans that address real-world challenges	V	Evaluating		
CO3	Develop successful software projects that support program's strategic goals and satisfies the customer needs	VI	Creating		
List of Experiments / Lab Activities					

## List of Experiments:

Project is to be carried out in a group of maximum 5 to 6 students. Project is to be carried based research paper from journals.

Each group will carry out a project by developing any application software based on the following areas.

1. Application can be based on any trending new technology.
2. Application can be extension to previous projects.
3. Results of the project is to be tested and validated against standard data set.
4. Project group should achieve all the proposed objectives of the problem statement.
5. The work should be completed in all aspects of design, implementation and testing and follow software engineering practices.
6. Project reports should be prepared and submitted in soft and hard form along with the code and other dependency documents. Preferable use online code repositories (github/bitbucket)
7. Project will be evaluated continuously by the guide/panel as per assessment plan.
8. Presentation and report should use standard templates provided by department.
9. Preferably student should present/publish article.

Project report (pre-defined template) should be prepared using Latex/Word and submitted along

with soft copy on CD/DVD (with code, PPT, PDF, Text report document & reference material) or

on an online repository.

Students should maintain a project log book containing weekly progress of the project.

<b>CO-PO Mapping</b>														
	<b>Programme Outcomes (PO)</b>												<b>PSO</b>	
	1	2	3	4	5	6	7	8	9	10	11	12	1	2
<b>CO1</b>					3							1		
<b>CO2</b>		1			2								1	
<b>CO3</b>	1	2												2

The strength of mapping is to be written as 1: Low, 2: Medium, 3: High  
Each CO of the course must map to at least one PO.

<b>Assessment</b>
<p>The assessment is based on MSE, ISE and ESE.</p> <p>MSE shall be typically on modules 1 to 3.</p> <p>ISE shall be taken throughout the semester in the form of teacher’s assessment. Mode of assessment can be field visit, assignments etc. and is expected to map at least one higher order PO.</p> <p>ESE shall be on all modules with around 40% weightage on modules 1 to 3 and 60% weightage on modules 4 to 6.</p> <p>For passing a theory course, Min. 40% marks in (MSE+ISE+ESE) are needed and Min. 40% marks in ESE are needed. (ESE shall be a separate head of passing)</p>

<b>1</b>	To Introduce geometric modelling and Virtual environment
<b>2</b>	To solve real world problems in AR VR
<b>3</b>	To explain various types of Hardware and software in virtual Reality systems

**Course Outcomes (CO) with Bloom's Taxonomy Level**

At the end of the course, the students will be able to,

CO	Course Outcome Statement/s	Bloom's Taxonomy Level	Bloom's Taxonomy Description
<b>CO1</b>	Understand fundamental computer vision, computer graphics and human-computer interaction techniques related to VR/AR	II	Understanding
<b>CO2</b>	Relate and differentiate VR/AR technology	IV	Analysing
<b>CO3</b>	Implement Virtual/Augmented Reality applications	III	Applying

Module	Module Contents	Hours
I	<b>Introduction to Virtual Reality:</b> Virtual Reality and Virtual Environment: Introduction, Computer graphics, Real time computer graphics, Flight Simulation, Virtual environment requirement, benefits of virtual reality, Historical development of VR, Scientific Landmark.	5
II	<b>Computer Graphics And Geometric Modelling:</b> Introduction, The Virtual world space, positioning the virtual observer, the perspective projection, human vision, stereo perspective projection, Colour theory, Conversion From 2D to 3D, 3D space curves, 3D boundary representation, Simple 3D modelling, 3D clipping, Illumination models, Reflection models, Shading algorithms. Geometrical Transformations: Introduction, Frames of reference, Modelling transformations, Instances, Picking, Flying, Scaling the VE, Collision detection.	6
III	<b>Virtual Environment:</b> Input: Tracker, Sensor, Digital Gloves, Movement Capture, Video-based Input, 3D Menus & 3D Scanner etc. Output: Visual /Auditory / Haptic Devices. Generic VR system: Introduction, Virtual environment, Computer environment, VR technology, Model of interaction, VR Systems. Animating the Virtual Environmen	7

IV	<b>Augmented Reality:</b> Taxonomy, technology and features of augmented reality, difference between AR and VR, Challenges with AR, AR systems and functionality, Augmented reality methods, visualization techniques for augmented reality, enhancing interactivity in AR environments, evaluating AR systems.	7
V	<b>Development Tools and Frameworks:</b> Human factors: Introduction, the eye, the ear, the somatic senses. Software: Introduction, Modelling virtual world, Physical simulation, VR toolkits, Introduction to VRML	7
VI	<b>AR / VR Applications:</b> Introduction, Engineering, Entertainment, Science, Training.	7

<b>CO1</b>	3		1										2		
<b>CO2</b>		2													
<b>CO3</b>	2		1											1	

The strength of mapping is to be written as 1: Low, 2: Medium, 3: High  
Each CO of the course must map to at least one PO.

<b>Assessment</b>
<p>The assessment is based on MSE, ISE and ESE. MSE shall be typically on modules 1 to 3. ISE shall be taken throughout the semester in the form of teacher’s assessment. Mode of assessment can be field visit, assignments etc. and is expected to map at least one higher order PO. ESE shall be on all modules with around 40% weightage on modules 1 to 3 and 60% weightage on modules 4 to 6. For passing a theory course, Min. 40% marks in (MSE+ISE+ESE) are needed and Min. 40% marks in ESE are needed. (ESE shall be a separate head of passing)</p>

Course Information					
<b>Programme</b>	B.Tech. (Information Technology)				
<b>Class, Semester</b>	Final Year, B. Tech., Sem VIII				
<b>Course Code</b>	5IT439				
<b>Course Name</b>	Professional Elective -5: Social Network Analytics				
<b>Desired Requisites:</b>	Data Structures				
Teaching Scheme		Examination Scheme (Marks)			
<b>Lecture</b>	3 Hrs/week	<b>MSE</b>	<b>ISE</b>	<b>ESE</b>	<b>Total</b>
<b>Tutorial</b>	-	30	20	50	100
	-	<b>Credits: 3</b>			
Course Objectives					
<b>1</b>	To introduce the concept of semantic web and applications				
<b>2</b>	To explain human behaviour in social web and related communities				
<b>3</b>	To express visualization of social networks				
Course Outcomes (CO) with Bloom's Taxonomy Level					
At the end of the course, the students will be able to,					
<b>CO</b>	<b>Course Outcome Statement/s</b>			<b>Bloom's Taxonomy Level</b>	<b>Bloom's Taxonomy Description</b>
<b>CO1</b>	Analyse human behaviour in social web and related communities			IV	Analysing
<b>CO2</b>	Evaluate relationships between social networks			V	Evaluating
<b>CO3</b>	Examine semantic web related applications			V	Evaluating
<b>Module</b>	<b>Module Contents</b>				<b>Hours</b>
I	<b>Introduction :</b> Introduction to Semantic Web: Limitations of current Web Development of Semantic Web, Emergence of the Social Web, Social Network analysis: Development of Social Network Analysis, Key concepts and measures in network analysis.				6
II	<b>Web Data Semantics and Knowledge Representation</b> Electronic sources for network analysis: Electronic discussion networks, Blogs and online communities, Web-based networks, Applications of Social Network Analysis. Ontology and their role in the Semantic Web: Ontology-based knowledge Representation, Ontology languages for the Semantic Web: Resource Description Framework , Web Ontology Language				7
III	<b>Modeling And Aggregating</b> State-of-the-art in network data representation, Ontological representation of social individuals, Ontological representation of social relationships, Aggregating and reasoning with social network data.				6
IV	<b>Issues Extraction And Mining Communities</b> Extracting evolution of Web Community from a Series of Web Archive. Detecting communities in social networks. Definition of community. Evaluating communities. Methods for community detection and mining.				6

V	<b>Predicting Human Behavior And Privacy Issues</b> Understanding and predicting human behavior for social communities, User data management, Inference and Distribution, Enabling new human experiences, Reality mining, Context, Awareness, Privacy in online social networks, Trust in online environment.	7
VI	<b>Visualization And Applications Of Social Networks</b> Graph theory, Centrality, Clustering, Node-Edge Diagrams, Matrix representation, Visualizing online social networks, Visualizing social networks with matrix-based representations, Matrix and Node-Link Diagrams	7

II	<b>Software Quality:</b> Software Quality Assurance, Software Reuse, Documentation Requirements, Standards, Software Configuration Management, Version Control, Baselines				7
III	<b>Software Reliability:</b> Software Reliability, Software Reliability Issues, Statistical Testing and Software Quality Management, ISO 9000, Case Tools, Characteristics of Case Tools				7
IV	<b>User Interface and Design:</b> Concept of user Interface and Design, Types of user Interface, Component Based GUI Development				7
V	<b>Software Fault Detection:</b> Basic terminology of Fault tolerant, Fault detection using fault tree, Fault tolerant in SRE, Techniques for Fault tolerant: Recovery blocks, N- version programming				5
VI	<b>Software Fault Analysis:</b> Fault tree modeling, Fault tree analysis, Analysis of fault tolerant software system, Quantitative analysis of fault tolerant system				6

CO-PO Mapping															
	Programme Outcomes (PO)												PSO		
	1	2	3	4	5	6	7	8	9	10	11	12	1	2	
CO1	1	3											2		
CO2			1												
CO3	2				2									1	
The strength of mapping is to be written as 1: Low, 2: Medium, 3: High Each CO of the course must map to at least one PO.															

Assessment	
<p>The assessment is based on MSE, ISE and ESE.</p> <p>MSE shall be typically on modules 1 to 3.</p> <p>ISE shall be taken throughout the semester in the form of teacher’s assessment. Mode of assessment can be field visit, assignments etc. and is expected to map at least one higher order PO.</p> <p>ESE shall be on all modules with around 40% weightage on modules 1 to 3 and 60% weightage on modules 4 to 6.</p> <p>For passing a theory course, Min. 40% marks in (MSE+ISE+ESE) are needed and Min. 40% marks in ESE are needed. (ESE shall be a separate head of passing)</p>
